OBJECTIVE

Enthusiastic about tackling challenging roles and collaborating with diverse teams to drive organisational success. Possessing extensive experience across various cloud and on-premises environments, I am dedicated to implementing high availability and resilient architectures. With a clear, logical mindset and a practical approach to problem-solving, I strive to see projects through to successful completion, contributing effectively to team objectives.

SUMMARY

- Over 4+ years of experience in **AWS, Azure, GCP** and **On-Premise**.
- Managed 40+ kubernetes clusters across DEV, STG and PRD for multiple customers.
- Executed successful migration from **48+** ECS services to EKS Kubernetes.
- Extensive experience with multiple CI/CD tools such as AWS **CodePipeline**, **CircleCI**, **Tekton**, **Drone.io**, **GoCD**, **Jenkins**, BitBucket Pipelines and Argo CD workflows.
- Implemented highly available **Redis clusters** with multi-node configurations.
- Efficiently managed and implemented **data migration** projects, including a migration of over **200 TB** from GCP to AWS.
- Having hands-on experience with **Terraform**, Serverless Framework (SLS), and **eksctl** for efficient infrastructure provisioning and management.
- Implemented **KEDA** and Horizontal Pod **Autoscaler** (HPA) based on Kafka events and cron scaling, ensuring seamless scale-out and scale-in in peak hours.
- Created AWS **EMR** clusters with 50 nodes for data migration for GCP to AWS.
- Implemented AWS **Media Converter** to optimise video delivery by segmenting videos into smaller chunks and reducing buffering through **CDN**.
- Having Deep knowledge in containerisation and orchestration technologies.
- Helped customer to reduce their infra cost initiating cost optimisation strategies (AWS).
- Implemented production-level monitoring solutions using **Grafana**, **Loki**, and **Mimir** to manage high volumes of logs effectively.
- Implemented AWS and Google Single Sign-On (**SSO**) and **VPN** to make completely privatised infrastructure application to ensure comprehensive security and isolation from vulnerabilities and threats.
- Extra ordinary communication skills can work with other team member and customers.
- Experience in different Orchestration tools such as Docker Swarm and **Kubernetes**.
- Extremely quality conscious and Attention to detail in handling and documenting technical issues.
- Having experience in infra monitoring to ensure application stability and performance.

TECHNICAL SKILLS

- **Cloud:** AWS, Microsoft Azure, and GCP
- **On-Premise:** Microk8s, KubeAdmin, Redis-Cluster and MongoDB Cluster
- **Monitoring:** Grafana, Prometheus (Mimir), Loki, Tempo, Zipkin, New-relic and Coroot
- **Scripting:** Python, Shell Scripting
- **VPN:** Pritunl, OpenVPN and AWS VPN endpoint
- **AWS Services:** VPC, Datasync, EC2, MediaConverter, EventBridge, ElasticBeansStalk, Amplify, Lightsail, IAM, SSO, Organisation, Route53, EBS, EFS, S3, CDN, WAF, CloudMap, EMR, Systems Manager, CloudWatch, CloudTrail, ECS, EKS, ECR, CodePipeline, CodeBuild, CodeCommit, Athena, ACM, MSK, ElasticCache, SQS, SNS, SES, Billing, Batch, Step Function, Lambda, DynamoDB, RDS, Secret Manager, CloudFormation and ChatBot..etc
- **Azure Services:** AD, VM, Load Balancer, Application Gateway, CDN, Traffic Manager, Azure Firewall, Blob, File Share, Queue and Table, AKS, On-Prem Backup (MARS), Azure site Recovery, Azure Bastion Host.
- **DevOps Tool Kit:** Docker, Kubernetes, Docker Swarm, Terraform, Ansible, **CICD**-CodePipeline, CodeBuild, CircleCi, Jenkins, Tekton, GoCD, Git Workflow and bucket pipelines, GitHub, **Monitoring**-Grafana, Prometheus, Loki, and Tempo Stack, **Orchestration**-ECS, EKS, CF, GKE, AKS and most of the CNCF tools.
- **Database:** (SQL and No-SQL) MYSQL, Postgres, DynamoDB and MongoDB.
- **CNCF and Infra Tools:** ArgoCD, Argo Rollouts, Argo events, Argo Workflow, Argo Notification, Argo Image Updater, Minio, Redash, Grafana, Open Telemetry, Containerd, Envoy, Helm, Fluentd, Istio, Linkerd, Keda, Karpenter, Harbor, Metabase, RedisUI, KafkaUI, Homer, GrowthBook, Passbolt, Redmine.

PROFESSIONAL EXPERIENCE

Betaflux Consulting Private Limited

DevOps Engineer

Pidge, Haven, Rideriver and hubbler

March 2023 - Present

- Proficiently designed and implemented end-to-end infrastructure solutions for multiple clients, encompassing **development**, **staging**, and **production** environments from the ground up.
- Skilfully utilised **DataSync** and **EMR** to orchestrate the efficient migration of 200 TB data, transitioning seamlessly from GCP to AWS with a keen emphasis on cost optimisation.
- Possessing extensive expertise and hands-on experience in managing Kubernetes clusters, including Amazon Elastic Kubernetes Service (**EKS**), Google Kubernetes Engine (**GKE**), and Azure Kubernetes Service (**AKS**).
- Helped client in optimising their video content streaming infrastructure by leveraging AWS Media Converter for latency reduction, complemented by **CDN** and AWS S3 Transfer Acceleration and caching mechanisms.
- Having proficient experience in orchestrating automated Continuous Integration and Continuous Deployment (**CICD**) pipelines, utilising a diverse array of tools including AWS

- Equipped with comprehensive expertise in multi-cloud environments, with adept knowledge spanning across AWS, Azure, and GCP.
- Possessing extensive knowledge and hands-on experience in deploying applications in Kubernetes, leveraging best practices to ensure efficient, scalable, and resilient containerised environments.
- Proficient in **Argo CD**, **Rollouts**, and **Workflows**, adeptly leveraging these tools to streamline and orchestrate deployment processes for seamless and efficient application rollout.
- Effectively managed over **40+ Kubernetes** clusters across development, staging, and production environments, catering to the needs of more than 15 diverse customers, ensuring seamless operations and optimal performance.

6D Technologies

Infra solution Engineer

Nayan

February 2020 - March 2023

- Engineered a highly available Redis cluster solution for a client, implementing **automatic failover** capabilities utilising Redis and **Redis Sentinel** to ensure continuous operation and uninterrupted service delivery.
- Successfully created and managed **MicroK8s** and **kubeadm** on on-premise servers, ensuring robust, scalable, and efficient container orchestration
- Engineered automation solutions for **Linux** systems focusing on clean storage management among other activities, significantly improving system efficiency and reliability.
- Implemented comprehensive **monitoring** solutions for infrastructure, enabling immediate actions on infra-related issues and substantially reducing downtime.
- Spearheaded the implementation of **SSO** for Jenkins, enhancing security and streamlining user access management across the organisation.
- Worked extensively with **GoCD pipeline**, facilitating customer migration from cloud vendors and promoting cloud-agnostic practices to enhance operational flexibility and reduce dependency.

EDUCATIONAL QUALIFICATIONS

- B. Tech Computer Science and Engineering **2015 - 2019**
- Higher Secondary (Kerala State Board) – **2013**
- Secondary School (Kerala State Board SSLC) – **2012**

DECLARATION

I am keen to continue my career and prepared to work hard to achieve my organization objectives and I hereby declare that the information furnished above is true to the best of my knowledge.
